## Technical Datasheet

### Solder Wave Discs RoHS Compliant

#### Description:

Solder Wave Discs also known as Wave Solder discs or Solder Wave Dots are designed for electronic manufacturing. These discs have superior stain resistant high temperature masking tape. Solder wave discs are constructed with a smoother crepe backing and provides for a finer paint edge with superior color separation.

#### Product Features:

- Superior heat resistant up to 300°F
- Removes without adhesive residue after exposure to heat /chemical
- Eliminates paint and primer flaking

#### Applications:

- Masking of metal, plastic and rubber surfaces where staining is a problem
- High temperature holding and splicing
- Industrial painting and spray

**Cross Reference:** 3M (213 and 232)

Color	Beige
Adhesion Type	Rubber
Material	Crepe
Thickness	6 Mil
Temperature Rating	300 <sup>0</sup> F (150 <sup>0</sup> C)
Adhesion to steel	34 oz/in
Tensile Strength	20 lbs/inch
Elongation	>6%

Due to the variety of possible end-uses, it is ultimately the responsibility of the customer to determine a product's suitability for a particular application.
