Technical Datasheet

Solder Wave Tapes RoHS Compliant

Description:

Solder Wave Tapes also known as Wave Solder Tapes or Solder Wave Masking Tapes are designed for electronic manufacturing. Solder wave tapes are constructed with a smoother crepe backing and provides for a finer paint edge with superior color separation.

Product Features:

- Superior heat resistant up to 300°F
- Removes without adhesive residue after exposure to heat /chemical
- Eliminates paint and primer flaking

Applications:

- Masking of metal, plastic and rubber surfaces where staining is a problem
- High temperature holding and splicing
- Industrial painting and spray

Cross Reference: 3M (213 and 232)

Color	Beige
Adhesion Type	Rubber
Material	Crepe
Thickness	6 Mil
Temperature Rating	300 ⁰ F (150 ⁰ C)
Adhesion to steel	34 oz/in
Tensile Strength	20 lbs/inch
Elongation	>6%

Due to the variety of possible end-uses, it is ultimately the responsibility of the customer to determine a product's suitability for a particular application.
